

Damon Braces Are Making a Difference – My Two Month Update

by Jennifer Sikora

.....

Before Christmas, I got my braces on. I went in for my consultation thinking the orthodontist was going to examine my teeth and then set the date up to get them on (like my daughter had went through with regular braces). I totally did not expect to walk out that afternoon with my new braces on my teeth!

Excuse the "no make-up" look. The dentist wiped most of it off!

From the moment I walked in — getting impressions, photos, molds of my teeth, and the actual braces put on, I was only in the orthodontist office for about an hour and a half tops. With my daughter, I remember her braces and everything taking a very long time. With the [Damon Braces](#), putting them on only took about 45 minutes total.

The piece that goes in your mouth to hold your lips apart doesn't hurt and has a cool suction device on it so your spit doesn't drown you (something I was really concerned about).

How Have I Done Since Getting the Braces On

I have now have my braces on for more than a month and I can tell you that my teeth have moved already! I can really tell a difference. My friend and I were talking about it the other day and she said she has noticed that since getting my braces on, I am already starting to smile a lot more. She said that before I got them on, I was always smiling sheepishly or hiding my smile. Now, I just let the smiles rip, because I know I am on the way to getting a beautiful grin again.

The place where I have noticed the biggest difference, is right in my two front teeth. You will notice in the photo below — the before braces photo, my two front teeth are crooked. One is behind the other, but in just a short month in a half, they are now side by side — something that has not happened since I was a little girl. The orthodontist told me the gap would be gone soon.

I love Damon Braces!

Here is a photo update so you can see the difference so far:

I can see such a big difference already and I cannot wait until everything is completely done. Damon Braces has definitely become a product I truly believe in.

About Damon Braces

The **Damon System** showcases how innovation and technology are changing the orthodontic industry—giving patients a beautiful, healthy smile at any age with more comfort and in less time. The Damon System is a combination of “tieless” passive self-ligating brackets, high-technology archwires and minimally invasive treatment protocols that work together to efficiently enhance facial balance and aesthetics and achieve smooth cheek contours, broad smiles and straight teeth.

[Damon Clear](#) is part of the innovative Damon System, and offers a virtually invisible orthodontic option that delivers fast, comfortable treatment to accommodate today’s image-conscious adults and teens. There are two types that you can choose from — Clear on top and bottom, or clear on top with the silver brackets on the bottom.

Over the course of the next year—as an official Damon Diva—I will be checking in periodically to let you know how my treatment is going, share tips for having braces as an adult, and to share information about the Damon System and how these wonderful braces can help you achieve a gorgeous, more self confident and beautiful smile!

If you don't want to wait, [you can visit the Damon Braces website today](#), find an orthodontist in your area that specializes in the Damon System and make an appointment and get started.

Don't be like me and wait because you think braces are too expensive or that you are too old. That is the beauty of this system. These braces are made for everyone — young and old. It's never too late to get the smile you've always longed for!
