

It's Never Too Late to Get Braces #damondiva

by Jennifer Sikora

Jennifer here to share with you about the wonderful Damon Braces that is helping me to have a gorgeous smile. I was provided a full treatment experience and compensated to share my progress with you, however all opinions remain my own.

This month marks exactly 9 months since I have had my braces on. For so many years, I put off having braces on my teeth because I thought that the treatment would take too long, or that it would be so extremely expensive I couldn't afford it. 9 months later, here I am — and my teeth have never looked more amazing.

I still have several months to go, but honestly — it's really not that long at all if you think of it in terms of the Damon Clear versus traditional braces. In the shape my teeth were in, I was pleasantly surprised that my orthodontist said I would be in braces for only about a year and a half.

It's Never Too Late

Check out this amazing infographic with lots of great information about why you should not wait.

Over the course of a year—as an official Damon Diva—I will be checking in periodically to let you know how my treatment is going, share tips for having braces as an adult, and to share information about the Damon Smile and how these wonderful braces can help you achieve a gorgeous, more self confident and beautiful smile!

If you don't want to wait, you can visit the Damon Smile website today, find an orthodontist in your area that specializes in the Damon Smile and make an appointment and get started.

Don't be like me and wait because you think braces are too expensive or that you are too old. That is the beauty of this system. These braces are made for everyone — young and old. It's never too late to get the smile you've always longed for!

I'm a Damon Diva and am being compensated for my time and will be treated with the Damon System and sharing that experience with you.
