

Give Your Mom A Reason To Smile With Damon Braces!

Damon System patient before-and-after

Description: 'Tis' the season to celebrate moms! Whether it's the mom who always picks you up when you're feeling down or the wife who is a fearless, selfless parent, this year give her a gift that will last a lifetime—a beautiful, radiant smile that is sure to leave her feeling like the fabulous woman and mom that she is. With advanced orthodontic technology, the Damon® System is able to improve your smile in less time than traditional braces with less frequent visits to the orthodontist, something all busy moms can appreciate. Not only is the Damon System a convenient alternative to traditional braces, it offers more discrete and aesthetically pleasing treatment. Damon Clear™ braces allow moms to achieve that red carpet smile without having the so-called metal "railroad tracks" for multiple years. Additionally, a straight smile has many health benefits that extend beyond increasing self-confidence. Properly aligned teeth help develop a better bite, which may reduce stress, headaches and strain on your bones and surrounding tissue. A beautiful smile, healthier gums and reduced stress levels—what else could your mom want? She deserves it! More information about the Damon System can be found at www.damonbraces.com.

Price: \$3,000.00 to \$8,000.00
